

Is Interactive Metronome® Right for Me or My Family Member?

The ability to clap to a steady auditory beat (i.e., metronome) is fundamental for many of our abilities. The Interactive Metronome (IM) measures & trains this basic timing ability, which leads to improvement in the areas listed below (individual results vary). To determine whether IM training will help you or your family member, please take a moment to complete this checklist.

COGNITIVE SKILLS (check all that apply)	
<input type="checkbox"/>	Trouble paying attention & concentrating (<i>loses focus, easily distracted</i>)
<input type="checkbox"/>	Trouble remembering things
